

ANAND KUMAR CHINTA

Senior .NET Backend Engineer | Technical Team Lead

Email: anand99chinta@gmail.com | Phone: +91-7842905424 | LinkedIn: linkedin.com/in/anandkumarchinta

PROFESSIONAL SUMMARY

Senior .NET Backend Engineer and Technical Team Lead with 4+ years of software engineering experience designing enterprise-grade backend applications using C#, ASP.NET Core, PostgreSQL, Entity Framework Core, RabbitMQ and REST APIs. Experienced in leading engineering teams, building scalable distributed systems, optimizing database performance, implementing secure authentication/authorization, and delivering mission-critical government and enterprise solutions. Hands-on with AI-powered applications using RAG, OpenAI APIs, Ollama and pgvector. Currently expanding expertise in Apache Kafka, Docker, Redis, Azure and cloud-native architectures.

KEY ACHIEVEMENTS

- Led a 9-member engineering team delivering enterprise applications across 15-20 production releases
- Designed and developed 100+ secure REST APIs using ASP.NET Core, serving 1000+ users
- Reduced PostgreSQL query response times by 30%-40% through indexing and query optimization on large-scale datasets
- Implemented RabbitMQ-based asynchronous processing, reducing notification delivery by 50%
- Built an AI-powered semantic document search system using RAG, Ollama, OpenAI, and pgvector
- Delivered government-scale enterprise applications used across 7 departments (Uganda water resource management)

CORE TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, TypeScript

Frameworks: .NET 10, ASP.NET Core, ASP.NET 4.5, Web API, Entity Framework Core

Databases: PostgreSQL, SQL Server, Performance Tuning

Messaging: RabbitMQ, Worker Services, Event-Driven Architecture, Kafka (Learning)

Architecture: Clean Architecture, SOLID, Microservices, Distributed Systems, Design Patterns

Cloud & DevOps: Docker, AWS, Azure (Learning), Git, GitHub, IIS, CI/CD

Frontend: React, HTML5, CSS3

AI: OpenAI APIs, Ollama, RAG, pgvector, Semantic Search

PROFESSIONAL EXPERIENCE

Technical Team Lead / Senior .NET Backend Engineer – TECHNOWELL, Hyderabad | Feb 2022 – Present

- Lead a 9-member development team delivering enterprise-grade backend solutions, providing technical guidance, mentoring, and delivery ownership.
- Architect and develop scalable RESTful APIs using C#, ASP.NET Core, Entity Framework Core, and PostgreSQL for enterprise applications.
- Develop and integrate full-stack enterprise applications using ASP.NET Core, REST APIs, React, JavaScript/TypeScript, HTML5, and CSS3.
- Drive code reviews, technical design discussions, sprint planning, mentoring, and production deployments across the development lifecycle.
- Implement JWT authentication, role-based authorization, and secure API design across distributed services.
- Improve application performance through SQL query optimization and database indexing, achieving 30–40% improvement in response times.
- Design and integrate RabbitMQ-based asynchronous messaging and background processing, handling approximately 500 messages/day.

- Collaborate with clients, stakeholders, and cross-functional teams to translate business requirements into effective technical solutions and deliver enterprise software.

KEY PROJECTS

WEIS – Water & Environment Information System (UGANDA)

Designed and developed enterprise backend services, secure REST APIs, and reporting modules for water resource data management, enabling centralized data processing and improved decision-making.

WEMIS – Water & Environment Management Information System (UGANDA)

Designed backend services, workflow automation, reporting modules, and secure REST APIs supporting government digital transformation. Optimized PostgreSQL performance and integrated enterprise modules.

MMRDA Complaint Management System (MMRDA-CMS)

Built an enterprise complaint management platform featuring complaint registration, approval workflows, escalations, notifications, reporting, and RabbitMQ-based background processing for scalable operations.

E-Learning Platform

Developed a full-stack learning platform supporting course management, secure authentication, online payments, learner enrollment, and scalable REST APIs for seamless course delivery.

Enterprise Application Monitoring Platform

Developed a centralized enterprise monitoring platform using ASP.NET Core, PostgreSQL, React, OpenTelemetry to monitor APIs, applications, and server performance, with real-time health monitoring, request tracking, error detection, performance metrics, and centralized dashboards.

Enterprise RAG-Based Document Search System (Personal Project)

Developed a Retrieval-Augmented Generation (RAG) platform using ASP.NET Core, PostgreSQL, pgvector, Ollama, and OpenAI APIs for semantic document search and AI-assisted question answering.

Earlier Experience — Project Operations and Engineer (2017 – 2022)

SEC Industries Pvt. Ltd-Hyderabad, VGR Technology Centre -Hyderabad, IVK Manuport Logistics-Dubai and SAS International Marine Services LLC -Dubai: Project planning, scheduling, cost estimation, project execution and client communication prior to transitioning into software engineering.

EDUCATION

Bachelor of Technology (B.Tech) - DNR College of Engineering & Technology, India

CERTIFICATIONS

AWS Cloud (Completion)

LANGUAGES

English — Fluent (professional working proficiency)

ADDITIONAL INFORMATION

- Open to relocation.
- Available for visa sponsorship opportunities.
